Multi-Agent Task Planning | LLM | embodied AI
CET-6: 578 | IELTS: Overall 7.0 (expired; planning to retake)

Education

2023 – present **B.Eng. Candidate in Robotics Engineering, Peking University**
Expected Graduation: June 2027
GPA: 3.53/4.0; 85/100; Rank 26%
Core Courses:

Probability and Statistics (94)	Foundations of Machine Learning (98)
Engineering Optimization Design (88)	Analog Electronic Technology (89)
Advanced Dynamics (87)	Robotics Lab I (89)
Mechanical Design Basics (89.7)	Introduction to Robotics (89)
Linear Algebra (87)	Mathematical Analysis I (86)

Research Experiences

Continuous Planning & Real-time Adaptation for Collaborative LTL Tasks *Jul. 2025 – Present*

- Built a multi-heterogeneous robot simulation platform (Unitree Go2, Scout) in Gazebo; validated algorithm robustness via kinematics comparisons.
- Designed a real-time adaptive strategy for LTL task decomposition; currently transferring to physical robot experiments.

LLM-based Multi-robot Cooperative Task Planning in Open Worlds *Jan. 2026 – Present*

- Completed literature review and offline planning code; currently integrating AI2-THOR simulation to test task allocation.
- Developing an online replanning module using LLM reasoning to handle environmental changes.

Skills

- **Programming:** Python (proficient), MATLAB
- **Robotics:** ROS/ROS2, Gazebo, RViz, AI2-THOR
- **ML/AI Tools:** basics of reinforcement learning, LLM integration (OpenAI API)
- **Tools:** LaTeX, Git, Linux

Awards & Competitions

- **Second Prize**, 22nd "Jiang Zehan Cup" Mathematical Contest, Peking University
- **Honorable Mention**, MCM/ICM 2026
- Multiple participations in mathematical modeling contests; strong quantitative and problem-solving abilities.

Professional Training & Internship

Spring 2026 — **Xbotics Online Internship.** Learned the Motrixlab simulation platform and implemented basic reinforcement learning algorithms for robot navigation. Gained hands-on experience with Sim-to-Real transfer pipelines.

2026 — **Alibaba DAMO Academy — Embodied Intelligence Bootcamp.** Participated in intensive training on embodied AI; completed a visual navigation demo using a robotic arm. Strengthened practical skills in robot perception and control.

Extracurricular & Work Experience

- Student Assistant, School of Advanced Manufacturing & Robotics, Peking University (current)
- Member, Study Department, Party Building Working Committee, College of Engineering (current)
- One-year service in the Organization Department, Youth League Committee, College of Engineering
